

At IMS Consulting, we empower organizations to work smarter by aligning people, processes, and technology. Our mission is to deliver solutions that simplify complexity, improve workplace experiences, and create measurable business value.

Services

- Implementation – Deploy and configure IWMS solutions tailored to your business needs.
- Integrations – Connect IWMS platforms with enterprise systems for seamless data flow.
- CAD/BIM – Deliver accurate space data through CAD and BIM modeling services.
- System Upgrades – Keep your IWMS current with version updates and feature enhancements.
- Hosting – Provide secure, reliable hosting for your IWMS environment.

Why IMS?

- Industry Expertise – Decades of experience implementing IWMS and GIS solutions across industries.
- Client-Centered – We don't just deliver software; we ensure adoption, usability, and long-term ROI.
- Innovation Driven – Helping organizations embrace emerging technologies without sacrificing stability.
- Integration Leaders – Few firms match our depth in IWMS + Esri integration.

Transforming how organizations manage space, assets, and people.

Our Capabilities

Workplace Management Solutions
Implementation and optimization of leading IWMS platforms—Archibus, Eptura, and ServiceNow—to streamline facility, space, and asset management.

GIS & Spatial Analytics
Harnessing the power of Esri technology to deliver geospatial insights that improve planning, resource allocation, and workplace strategy.

Data Integration & Reporting
Building connected systems and interactive dashboards that unify workplace data, enabling smarter, data-driven decision-making.

Strategic Advisory & Consulting
Partnering with organizations to define workplace strategies, optimize technology investments, and deliver measurable business value.

We're pioneering AI capabilities for IWMS platforms through IMS.ai. By embedding intelligence into IWMS applications, we help organizations reduce response times, optimize resources, and deliver smarter workplace operations.
